

For our team in Pfungstadt, we are looking for a Java Developer Security Solutions (m/f)

Your tasks

- software design & development in an agile (Scrum) team
- analysis / reverse engineering of applications to be secured
- continuous research and prototyping for new technologies and frameworks

Our expectations

- analytical approach and curiosity about how things work, not only if they work
- more than 6 months of working experience in professional software development with Java; Open Source experience works, too
- working experience with relational database systems
- in-depth understanding of network protocols and web services (SOAP and REST)
- optional skills, including:
 - knowledge about Java EE, Maven, OSGi & Apache Tomcat
 - working experience with Scrum, Jira and version control systems
 - basic cryptography knowledge
- responsibility, commitment and team spirit
- fluent English skills; basic German skills

We offer

- a permanent position and an attractive workplace in an innovative high-tech enterprise
- opportunity to contribute to a growing standard solution for the IT security market
- valuable domain knowledge in the IT security sector
- high-quality work tools like UHD monitors and ultrabooks
- free drinks, table soccer, cantina and parking
- a respectful and trustful office culture
- an attractive and competitive salary

About eperi

If you want to develop standard solutions for IT security instead of just being a service provider, we are your company. We are a leading provider of Cloud Data Protection solutions with 15 years of experience in data encryption for customer-specific web apps and leading SaaS applications like Salesforce and Office 365. Several hundred enterprise customers already secure their data with us. Our head office is located in Pfungstadt. Our London, Great Britain, branch operates since 2017. Our company is led by founder and CEO Elmar Eperiesi-Beck. With more than 30 employees, we are a successful, steadily growing enterprise.
